

### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Geza C. Ziegler, Jr. (Reg. No. 44,004) on May 16, 2008.

3. The application has been amended as follows:

1. **(Currently Amended)** A client device for obtaining a data object from a server device, comprising:

a transmitter for sending to the server device a request comprising a first codeword and an arbitrary alphanumeric string, wherein the first codeword indicates that the alphanumeric string should be interpreted at the server as a search string; and

a receiver for receiving from the server device, in reply to the request, a data object comprising the arbitrary alphanumeric string;

wherein the request additionally comprises a second codeword indicating a database to be searched by the server and a third codeword indicating a memory location of the database to be searched by the server, wherein the first codeword is

'search', wherein the second codeword is one of 'pb', 'cal' and 'msg', and wherein the third codeword comprises one of 'SIM' or 'file'.

**2. (Currently Cancelled)**

**3. (Currently Cancelled)**

**9. (Currently Cancelled)**

**10. (Currently Cancelled)**

**11. (Currently Cancelled)**

**17. (Currently Amended)** A method of obtaining a data object from a server device, comprising:

composing a request comprising a predetermined first codeword and an arbitrary alphanumeric string, wherein the first codeword indicates that the alphanumeric string should be interpreted at the server as a search string;

sending the composed request to the server device; and

receiving from the server device, in reply to the request, a data object comprising the arbitrary alphanumeric string;

wherein the request additionally comprises a second codeword indicating a database to be searched by the server and a third codeword indicating a memory location of the database to be searched by the server, wherein the first codeword is 'search', wherein the second codeword is one of 'pb', 'cal' and 'msg', and wherein the third codeword comprises one of 'SIM' or 'file'.

18. **(Currently Amended)** A server device for providing a data object to a client device, comprising:

a receiver for receiving from the client device a request comprising a first codeword and an arbitrary alphanumeric string;

parsing means for parsing the request;

detection means for detecting the presence of the first codeword in the request;

search means for searching a database comprising data objects to obtain a data object comprising the alphanumeric search string; and

a transmitter for transmitting to the client device, in reply to the request, the obtained data object;

wherein the request additionally comprises a second codeword indicating the database to be searched and wherein the search means is arranged to search the database indicated by the second codeword;

wherein the request additionally comprises a third codeword indicating the memory location of the database to be searched and wherein the search means is arranged to search at a memory location indicated by the third codeword;

wherein the first codeword is 'search', wherein the second codeword is one of 'pb', 'cal' and 'msg', and wherein the third codeword comprises one of 'SIM' or 'file'.

**20. (Currently Cancelled)**

**21. (Currently Cancelled)**

**26. (Currently Amended)** A method of providing a data object to a client device, comprising:

receiving from the client device a request comprising a first codeword and an arbitrary alphanumeric string;

if the first codeword is in a received request, searching a database comprising data objects, using the alphanumeric string as a search string, to obtain a data object comprising the alphanumeric search string; and

transmitting from the server device, in reply to the request, the obtained data object;

wherein the request additionally comprises a second codeword indicating a database to be searched by the server and a third codeword indicating a memory location of the database to be searched by the server, wherein the first codeword is 'search', wherein the second codeword is one of 'pb', 'cal' and 'msg', and wherein the third codeword comprises one of 'SIM' or 'file'.

***Allowable Subject Matter***

4. Claims 1, 4-8, 12-19, and 22-26 are allowable over prior art of record in light of the arguments presented in the Amendment filed March 10, 2008 and the Examiner's Amendment above.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Y. Won whose telephone number is 571-272-3993. The examiner can normally be reached on M-Th: 7AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Saleh Najjar can be reached on 571-272-4006. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2155
